| GRAVENSTEIN—A large attractive orange-yellow apple overlaid with stripes of red. August   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| McINTOSH RED—Medium size; red, white flesh, tender, juicy. Productive. Very hardy. November-December  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| RED DELICIOUS—A red striped, long pointed apple of fine flavor and bouquet. October-November  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| YELLOW DELICIOUS—Large golden-yellow fruit. Flesh crisp and juicy, of very fine texture. Hardy grower, prolific bearer. September   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| YELLOW TRANSPARENT—A very early medium large, pale yellow apple. Abundant bearer. August  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| <b>APRICOTS</b>   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| BLENHEIM—Large, oval. Yellow, rich and juicy. Regular and prolific bearer. August   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| PERFECTION—New. Extra large fruit. Flesh firm, juicy with rich flavor. July-August  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| ROYAL—Flesh is deep orange with red cheek; rich and sweet flavor; medium size; good bearer. August  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| TILTON—Fruit large size; rich apricot color; flavor of highest quality; bears very heavy. August  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| WENATCHEE MOORPARK—Very large size; skin orange with red cheek; flesh firm; juicy; good flavor. July-August   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| <b>CHERRIES, Sour</b>   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| MONTMORENCY—Large; red, tender flesh; mildly acid. One of best canning varieties. Late June   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| <b>CHERRIES, Sweet</b>  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| BING—Large fruit, black; very fine; July  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| LAMBERT—Very large fruit, dark-red. Flavor sweet, or very mild sub-acid, aromatic, rich. July   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| ROYAL ANN—(Napoleon Bigarreau) pale yellow with bright red cheek, flesh very firm, juicy and sweet. One of the best for canning. July   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| <b>NECTARINES</b>   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| BOSTON—Medium; deep yellow with a bright blush and deep mottlings of red; flesh yellow without any red at stone; sweet; freestone   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| QUETTA—A new variety; flesh yellow and highly colored; very hardy   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| <b>PEACHES</b>  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| EARLY CRAWFORD—Large, roundish bright yellow with red cheek; flesh yellow, juicy and sweet. Aug-Sept  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| ELBERTA—Large size, freestone, bright color, yellow flesh. September  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| GOLDEN JUBILEE—A new yellow freestone ripening ahead of the Rochester; firm, rich in sugar, delightfully fragrant. July to August   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| HALE HAVEN—A new variety of outstanding merit. Fruit fine grained, firm, rich, golden fleshed freestone. Bears very heavily. Ripens two weeks ahead of Elberta                          |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| IMPROVED ROCHESTER—Yellow freestone, an especially fine strain of the Rochester. August   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| J. H. HALE—Very large; globular; deep yellow overlaid red. Very solid flesh. September  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| RED HAVEN—One of earliest freestones, ripening about 10 days ahead of Golden Jubilee. Bright red color with creamy yellow background; smooth skin; heavy bearer. July to August         |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| ROCHESTER—Yellow freestone, good size, very sweet and fine flavor. August   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| STRAWBERRY—Skin pale yellow, marbled with dark red; flesh white, juicy, melting, rich. August   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| <b>PEARS</b>  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| BARTLETT—Large size, with beautiful blush next to sun. Very juicy and high flavored. Strong grower. Very popular August   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| CLAPP'S FAVORITE—Bright yellow with red cheek. Rich flavor. Sweet and refreshing. Flesh melting, very pleasant flavor. September  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| COMICE—Large; crimson cheek; melting; perfumed; flesh luscious. October-November  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| D'ANJOU—Large; buttery, melting, vinous flavor. November-December   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| FLEMISH BEAUTY—Fine looking large fruit, juicy. Strong grower and good bearer. September-October  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| HARDY—An early fall pear, large lemon-yellow over-spread with cinnamon russet. Very juicy and sweet. September  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| TONGERN—Large, golden brown dotted with soft red of extraordinary beauty. Fruit ripens in early fall and is juicy and highly flavored. September  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| WILLIAMS—Similar to the Bartlett. Large fine fruit but without the musky flavor of the Bartlett. Rich yellow with faint blush on exposed cheek. Delicious flavor. Early fall. September |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| WINTER NELIS—A delicious winter pear of medium size; flesh yellowish white; very juicy when ripe. December  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| <b>PLUMS</b>  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| BURBANK—Beautiful dark red with delicate bloom. Flesh rich yellow. Small stone. Fine quality. August  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| CLIMAX—Beautiful, cherry red; yellow-golden meat; delicious flavor; large, heart-shaped. July   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| DATE—Good size; firm; very sweet, reddish purple; can be dried similar to Italian. Very good either fresh or dried. September   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| ITALIAN PRUNE—A fine late prune. Oval, purple fruit. Juicy and very productive. Delicious. September  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| PEACH PLUM—Fruit large and one of earliest to ripen; regular, roundish; skin red; flesh greenish-yellow; tinged with red at maturity; rich flavor. July                                 |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| PLUM-COT—Medium size; crimson, fine flavor suggestive of apricot. This is a cross between the apricot and plum. July  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| PRESIDENT—Fine flavor; medium to large; skin blue; flesh yellow; heavy bearer. August   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| SATSUMA—Very large; well flavored with blood red flesh; skin red; small pit; good for canning. July   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| SHIRO—Egg-shaped; medium size, smooth, bright yellow. Very productive. August   |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| VICTORIA—Large; rosy pink, spotted with gold and silver. Freestone; flesh crisp and juicy and extremely rich. August  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |
| YELLOW EGG—Large; golden yellow; flesh firm, sweet and juicy. Good for market or canning. August  |                   |          |            |           |                 |         |           |          |          |                   |                   |                 |           |

10c less on Dwarf Pears

Dwarf trees are grown from the same stock as our espaliered trees, and have most of their advantages. They require very little space—only one-fourth as much as an ordinary tree. Yet they yield an abundance of delicious fruit.

When fully grown, the maximum height of dwarf trees is not over 10 feet, and by proper pruning they can be kept down to six feet. This makes it easy to prune and spray them, and the fruit, which is of true variety, is within reach for easy picking.

### TERMS

Cash should be forwarded prior to shipments; C.O.D. shipments, 50% in advance.

ALL PRICES F.O.B. SHERWOOD, OREGON

Packing and crating at cost.
